

Home Away From Home.

Inspiration

“hideaways”

Tent i set up in
my living room
where i would
read a lot as a kid

Spot behind the
couch where I hid
when I wanted to
listen to music
and chill alone

MOODBOARD

Senses Engaged

felt blankets around my and book/activities in my hand

Sama Shah

heard music and the outside world (my family) functioning outside

Sama Shah

saw a vast space for myself resembling a tree house experience

Sama Shah

tasted snacks that i would bring from the kitchen into my room

Sama Shah

sat up straight, lied down

Sama Shah

excitement

Sama Shah

happiness

Sama Shah

relaxation

Sama Shah

curiosity

Sama Shah

Experiences Recalled

nap and cuddle up in blankets

Anonymous (Visitor)

meditative to music, and hype radio music

Anonymous (Visitor)

Read twilight

Anonymous (Visitor)

In my free time I would "escape" to spend time in a large camping tent set up in my living room

Anonymous (Visitor)

large and empty space not surrounded or filled with lots of people outside

Sama Shah

organized compartments for my snacks, books, headphones and devices

Sama Shah

blankets everywhere for support and comfort

Sama Shah

ambient lighting from a lamp outside that i positioned next to the tent

Sama Shah

Building Blocks of the Environment
(Digital and Physical)

light sources inside the tent so i could use it at night (more ambient lighting and fairy lights) - mystical decor so that it felt like i was away from home in a treehouse

Sama Shah

a scent that isnt produced from a candle

Sama Shah

louder music that cant be heard from outside

Sama Shah

a way for me and others to communicate between outside and inside this tent about where i am and when to eat.

Anonymous (Visitor)

more seating or elevations that would allow me to relax in different and comfortable ways

Sama Shah

devices that could be used to provide music and cinematic entertainment, without being a distraction

Sama Shah

an opportunity for it to actually be outside and enjoy nature, watch the stars, disconnect from reality.

Sama Shah

Wishful Adds:
Items you might have desired to refine your engagmt

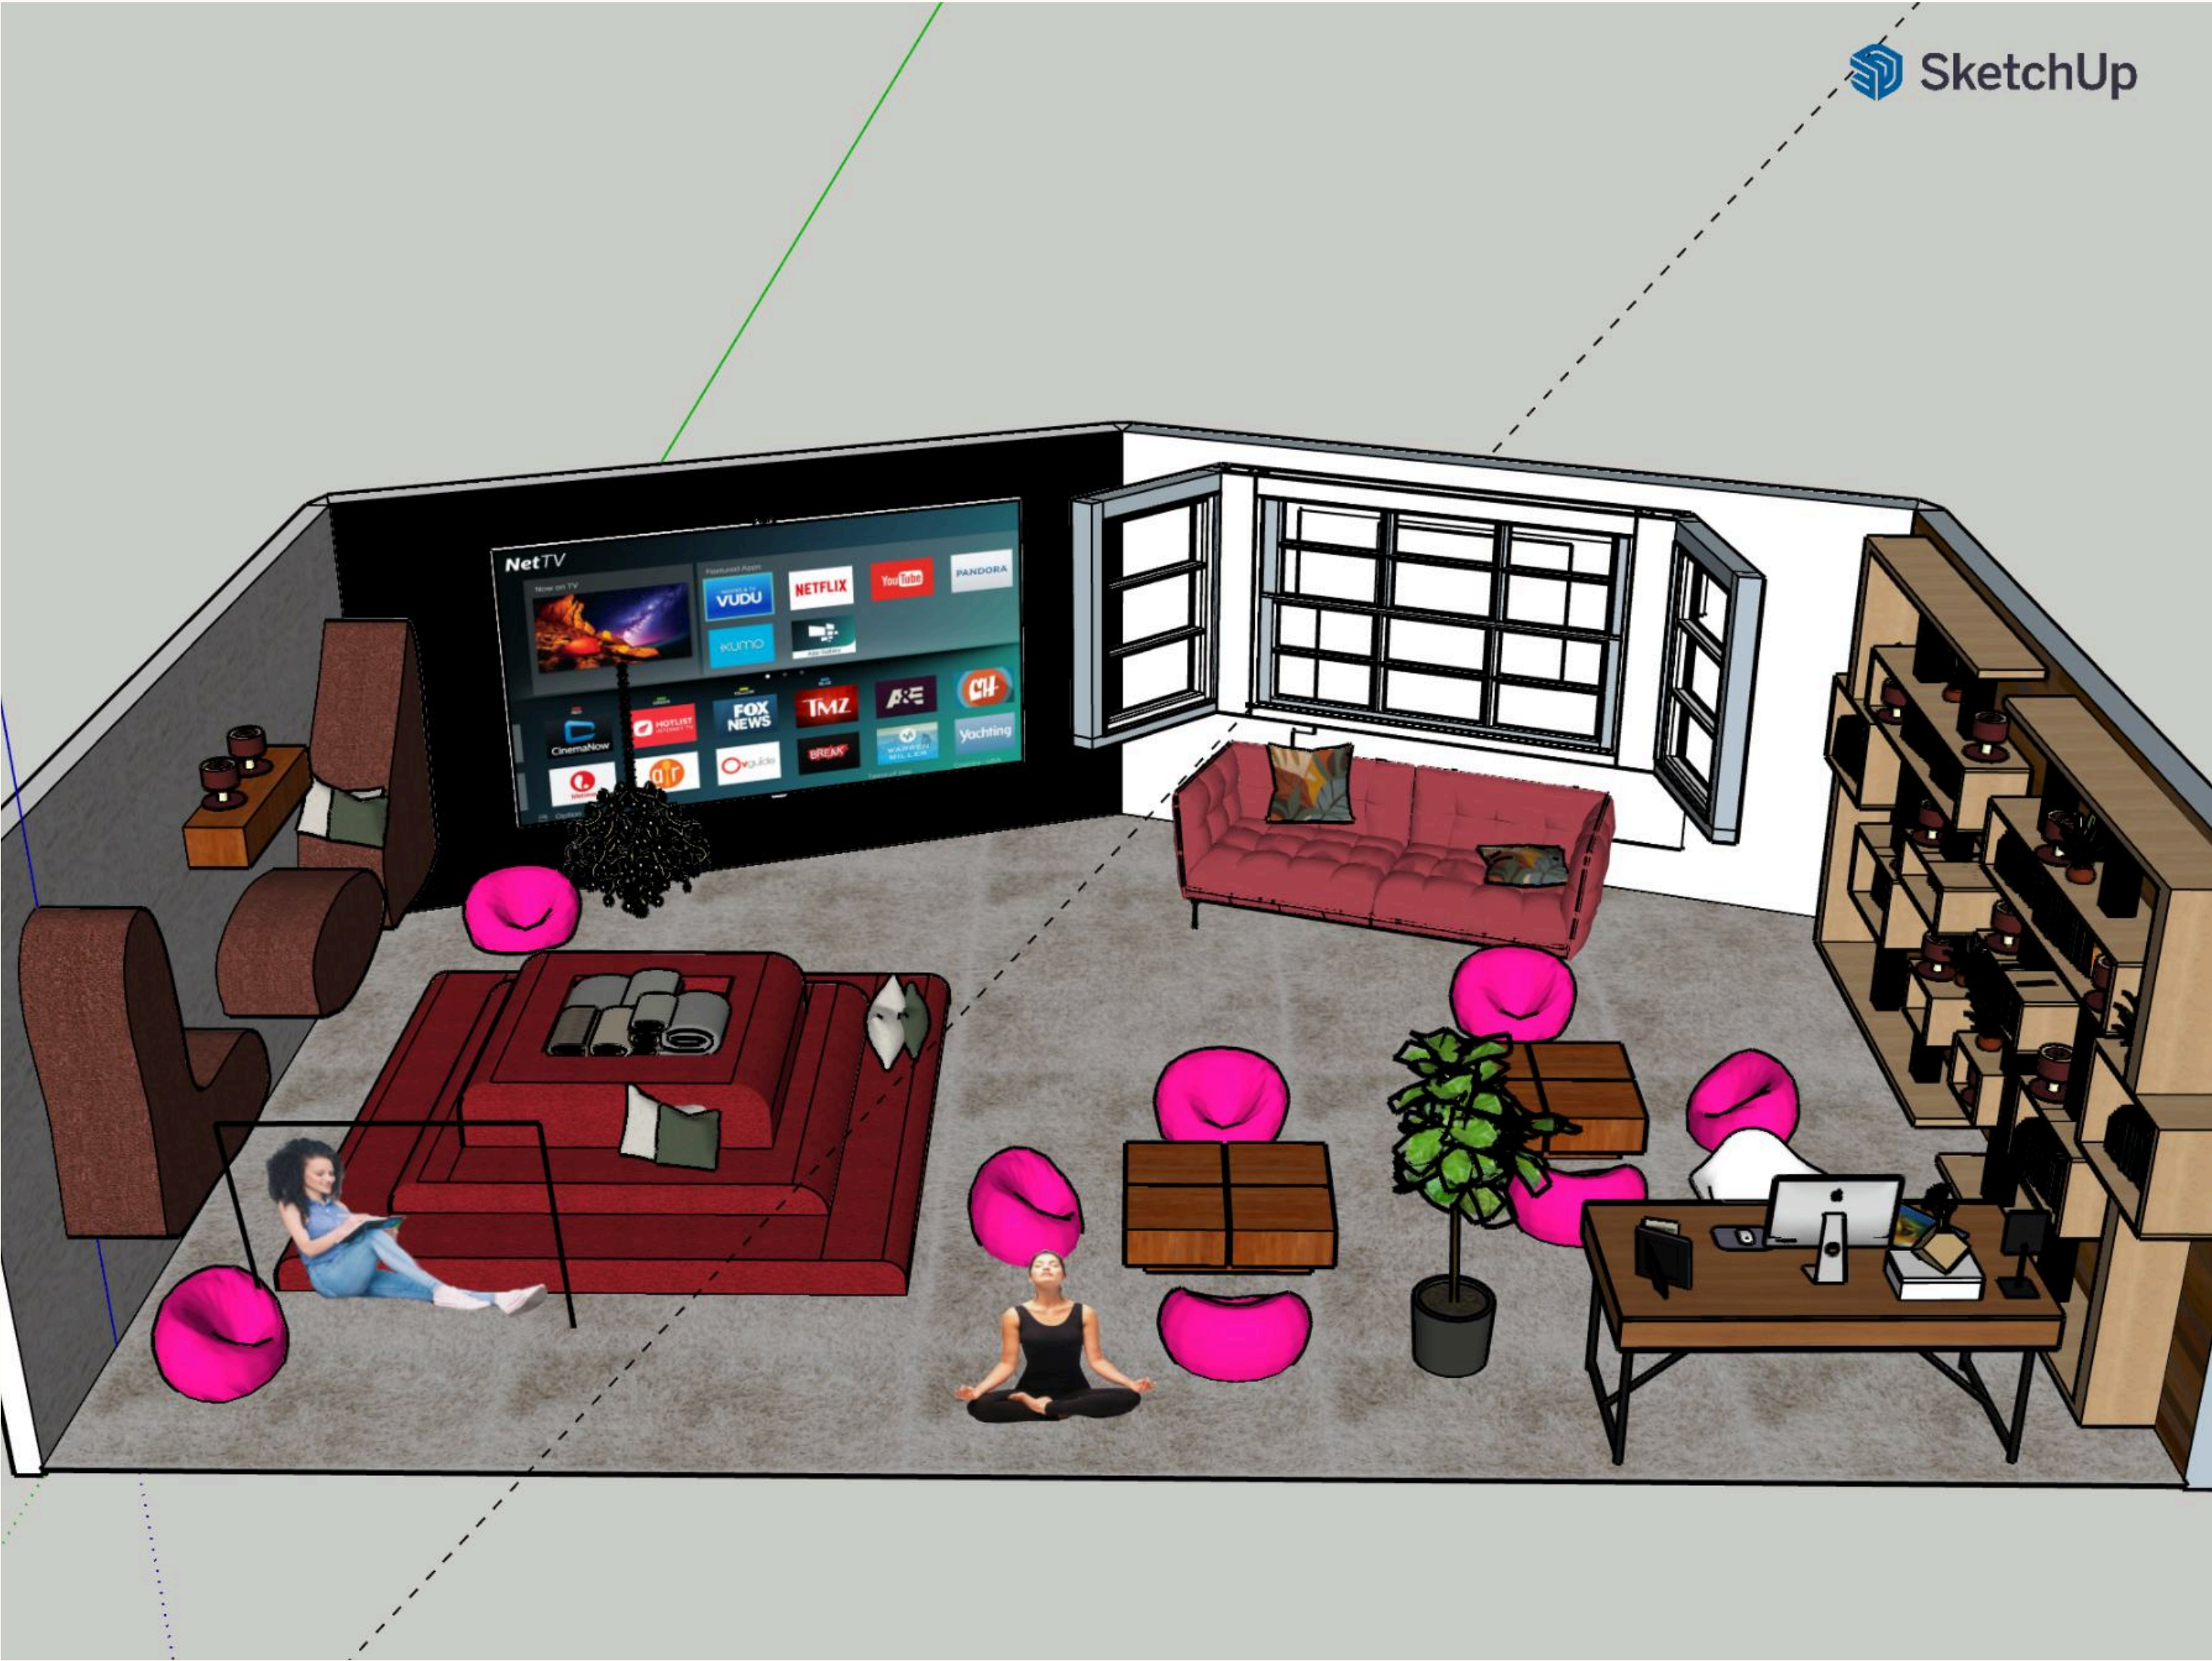

How would I reinvent my favorite hiding spot to
a greater scale?

SKETCHUP MODEL

Dimensions:
 $18\text{ft} \times 27\text{ft}$
 $+ [(0.5)4\text{ft} \times 27\text{ft}]$

540 ft^2

height: 8ft.

SIGHT

Lighting.

Lighting of a room makes or breaks a comfortable experience.

Crystal chandelier offers rainbow reflection of sunlight for ambiance during the day, and a warm tone lighting at night. Throughout the room there are multiple lamps to enable light control & personalize space through illumination. Plenty natural light comes in from bay window.

TOUCH
THE VESTIBULAR SYSTEM

Soft floor, furniture, and wall. Wooden library.

But when I'm in the space to read, I want to enter a wooden antique feeling of a bookstore, but I want to come back to a soft comfortable place to come back to.

Floors and furniture will be soft, varying plushiness, and made of materials that get warmer the longer you are in it.

THE PROPRIOCEPTIVE SYSTEM
THE VESTIBULAR SYSTEM

Elevations and cushioning.

I love laying down on the floor, sideways, rolled up in a ball, criss cross, mermaid style, upside down, anything.

Floor and wall seating with cushions, pillows, and carpet floors to provide a variety of ways one can sit and relax to read a book or watch TV. This encourages spending time on the floor and moving around bean bags or cushions.

The height of the space is 8' so that it feels more enclosed like a DIY fort.

SMELL

Natural scents.

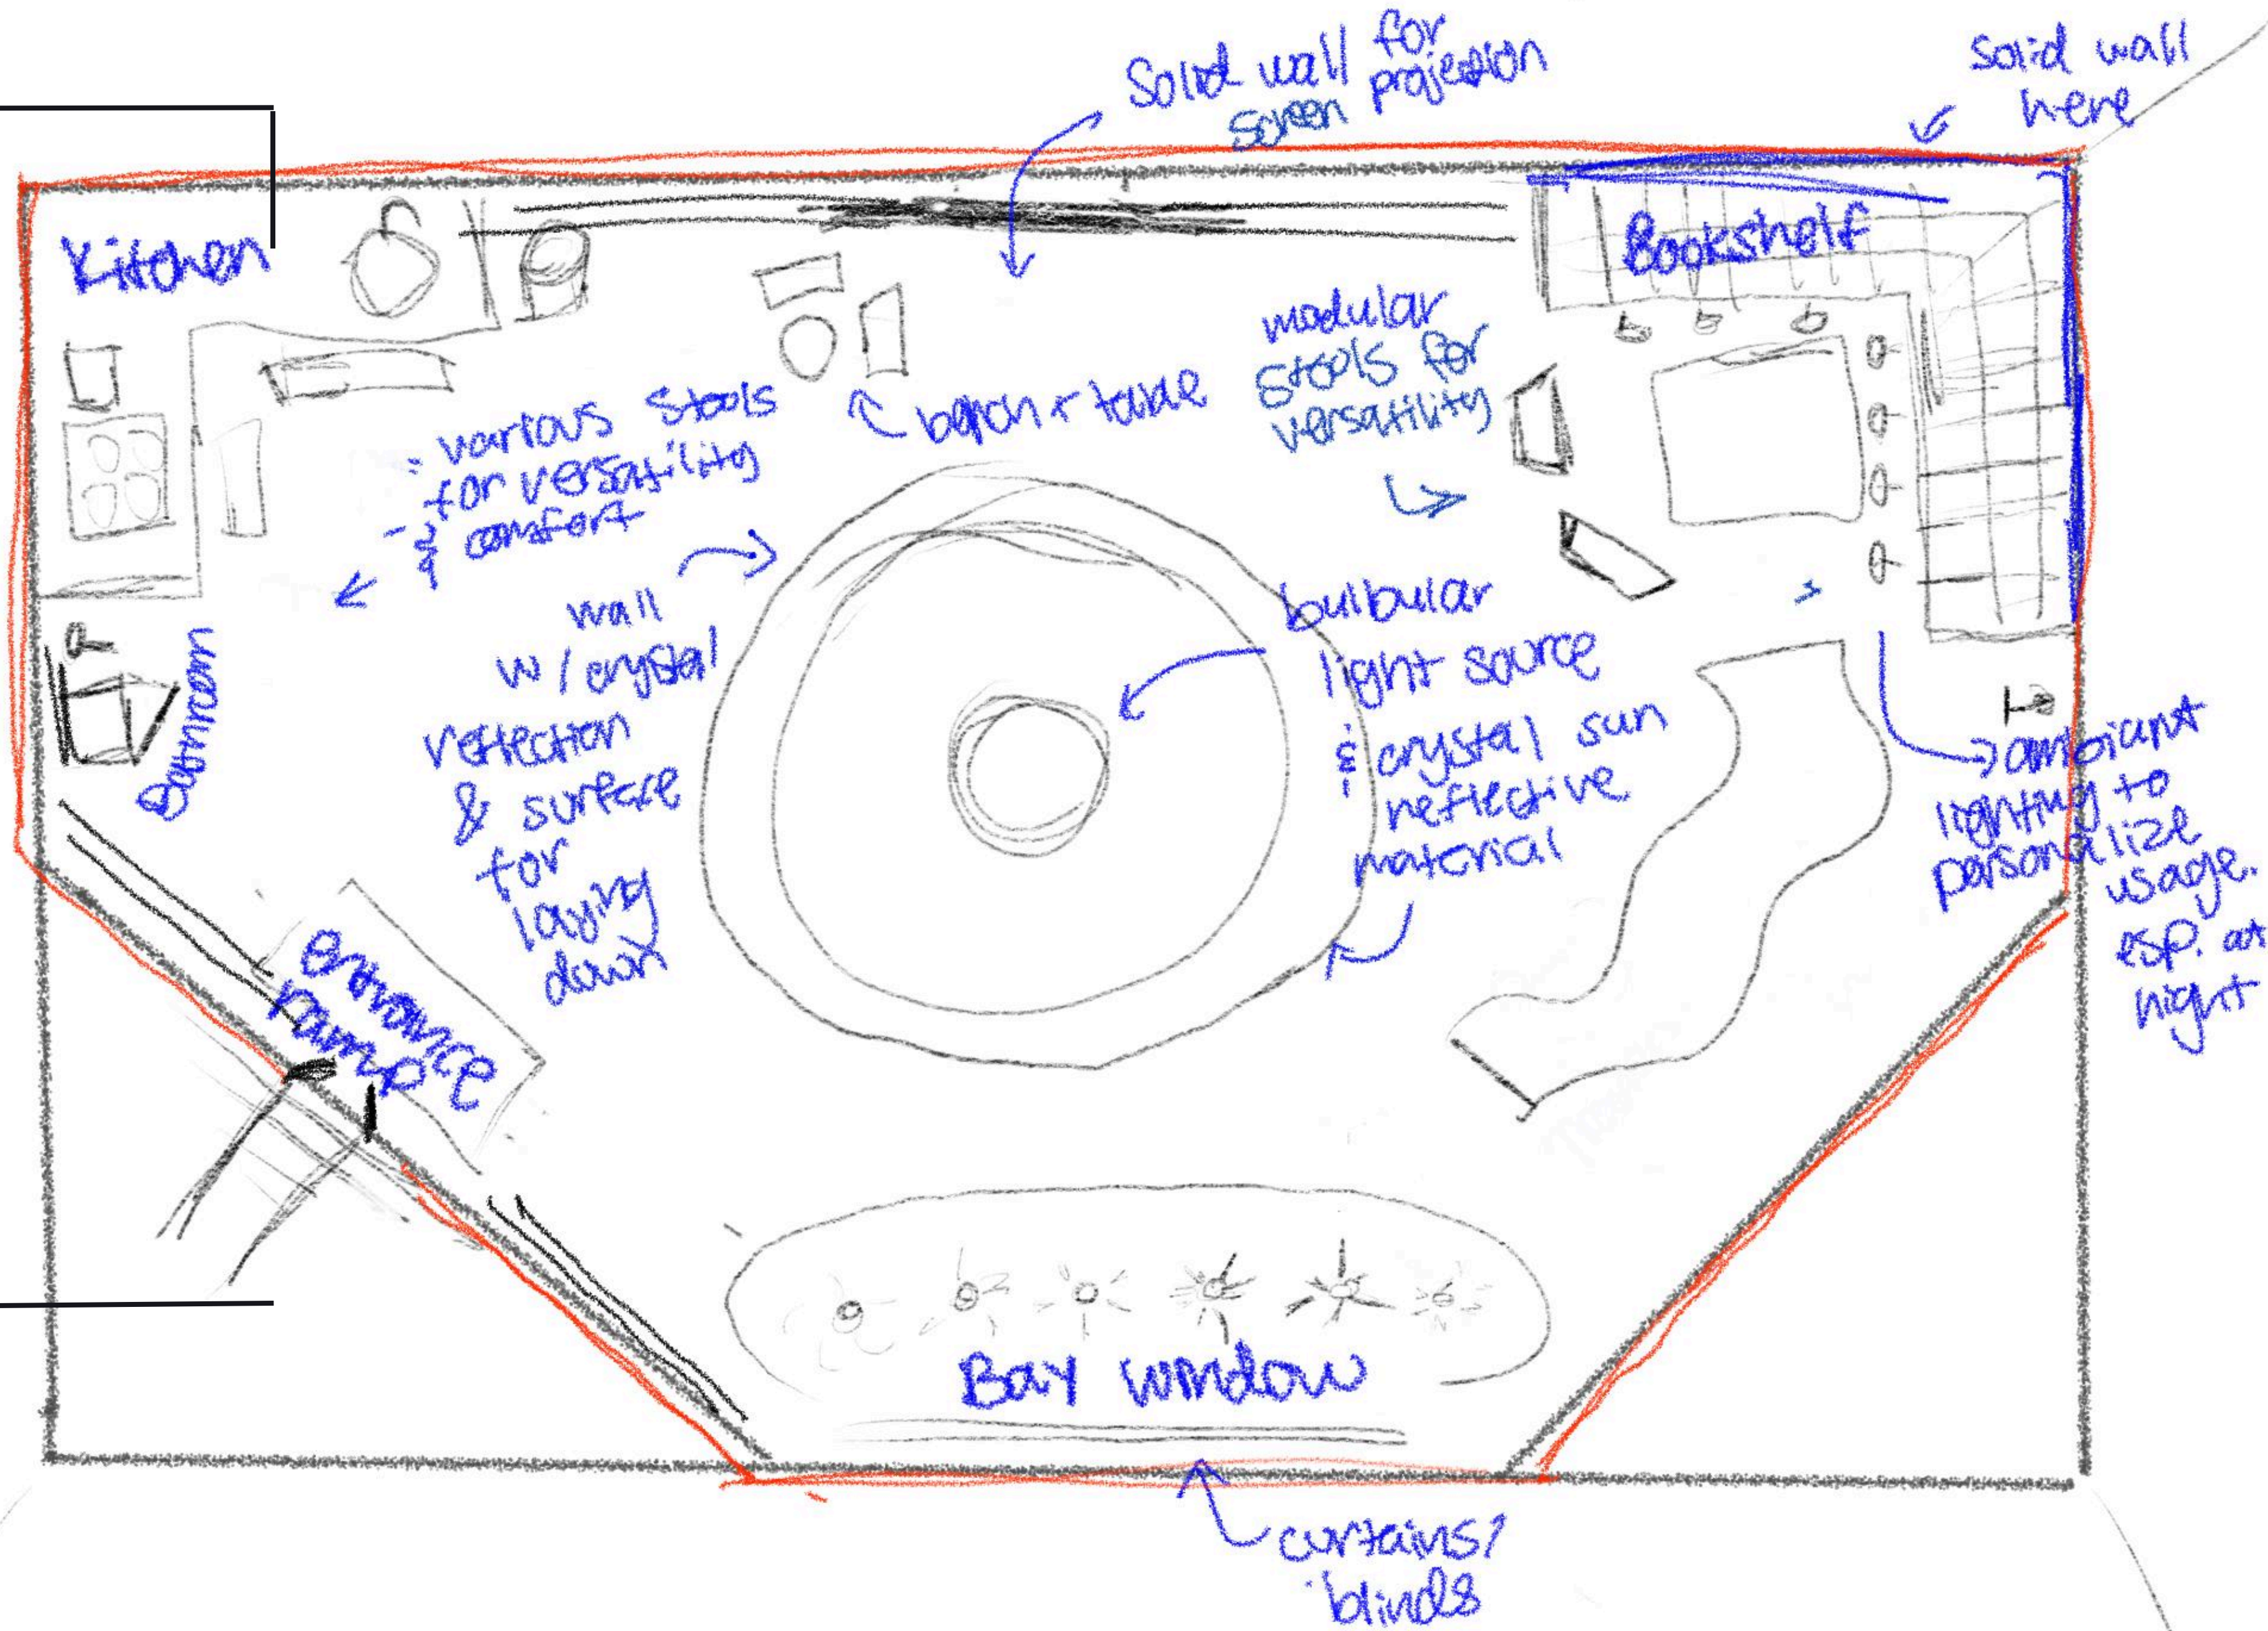

I always use natural scents like lavender in my room to feel relaxed and refreshed. I also love the smell of books, it is what sets makes reading a physical book a preferred experience over a digital book.

Natural herbs dispersed between books on a wall-long bookshelf to create a natural blend between the smell of plants, books, and wood.

IDEATION PROCESS

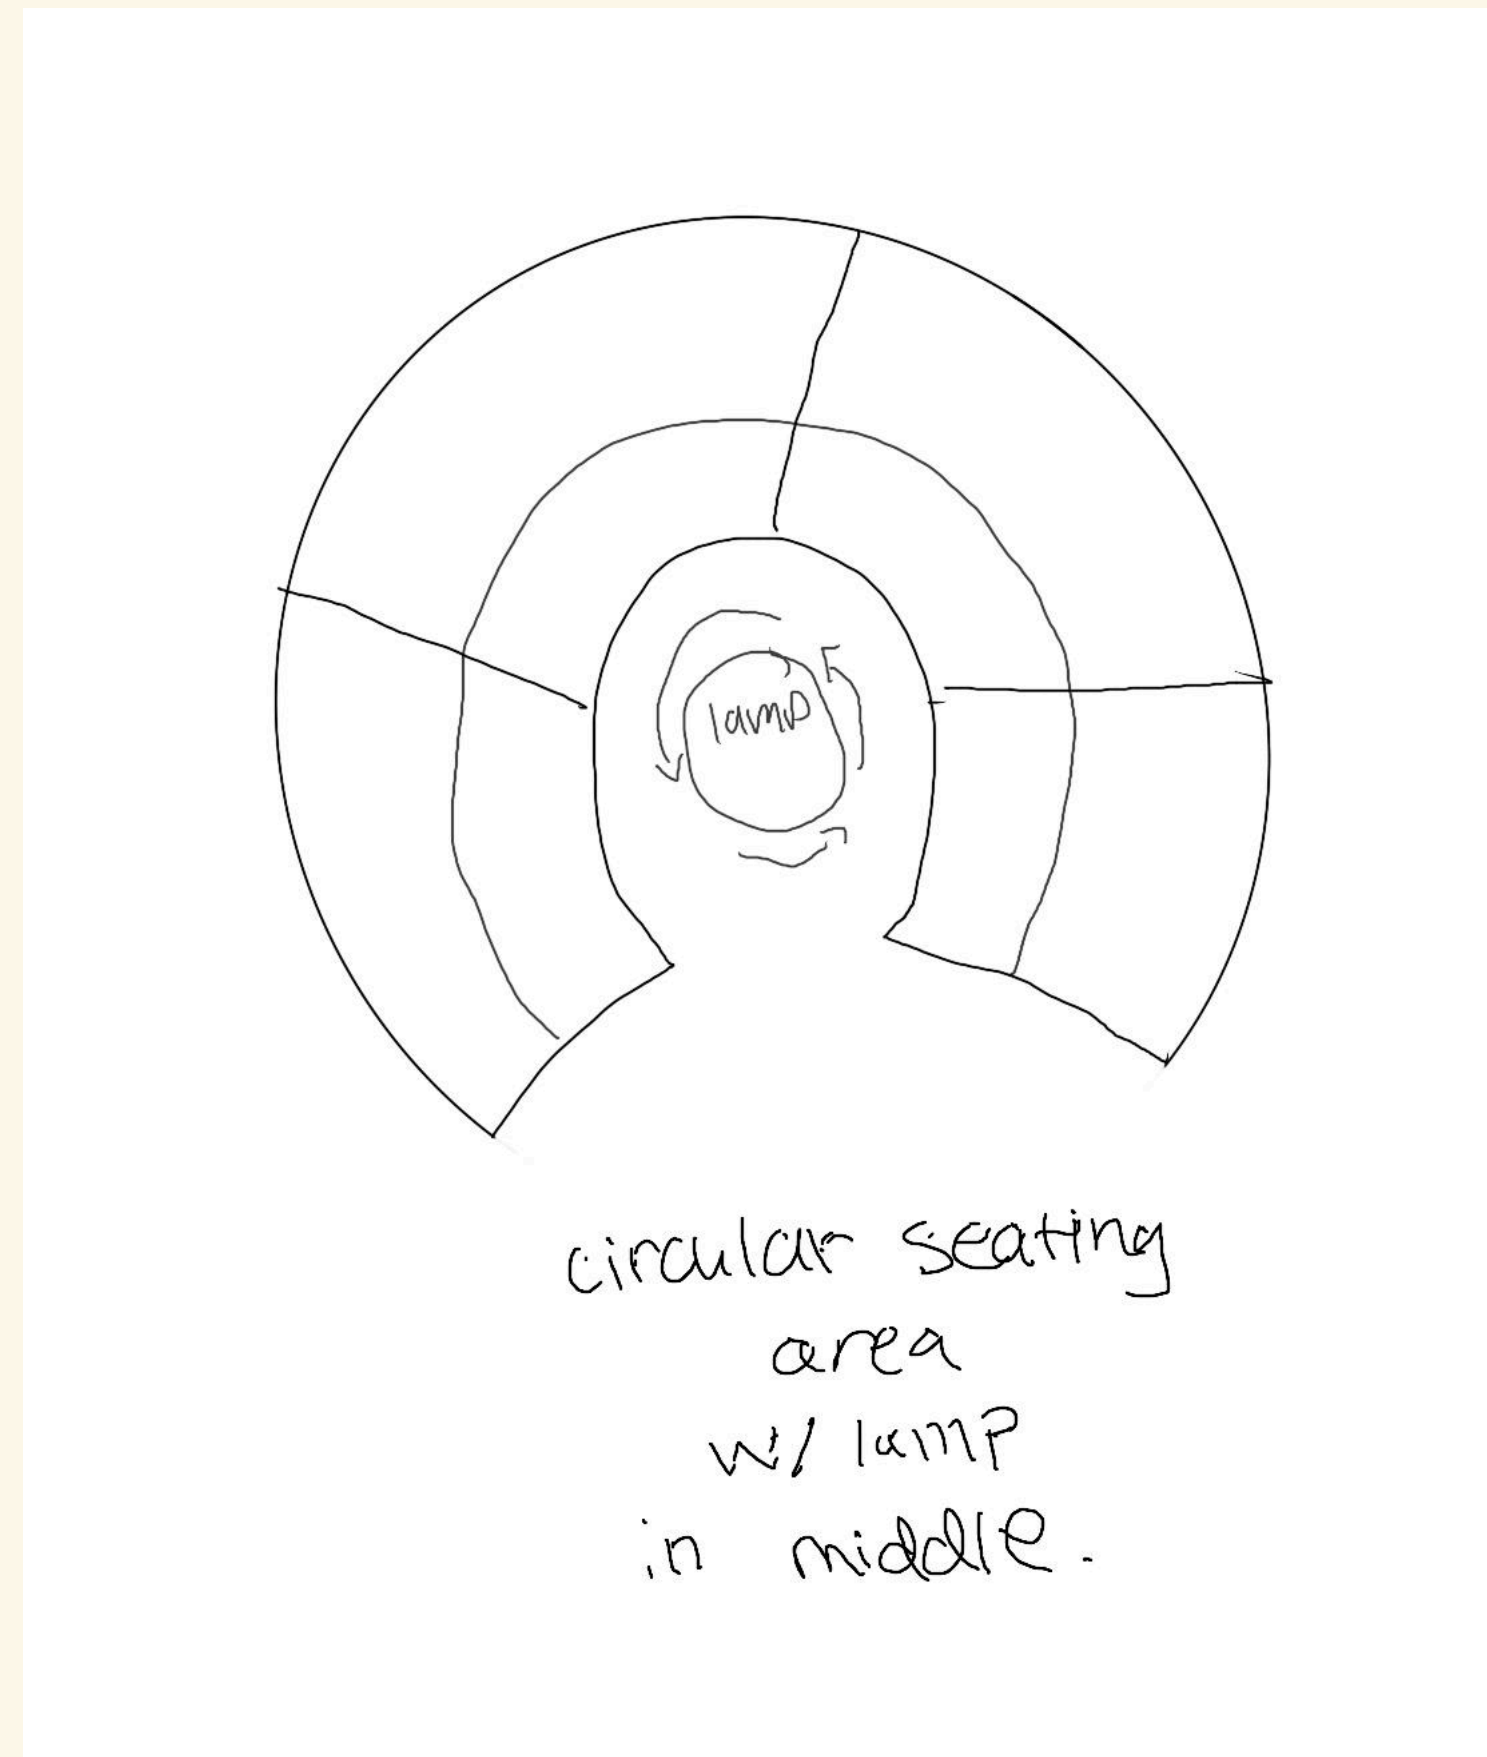

kitchen was removed because the rooms purpose is relaxation and past time, not utility based.

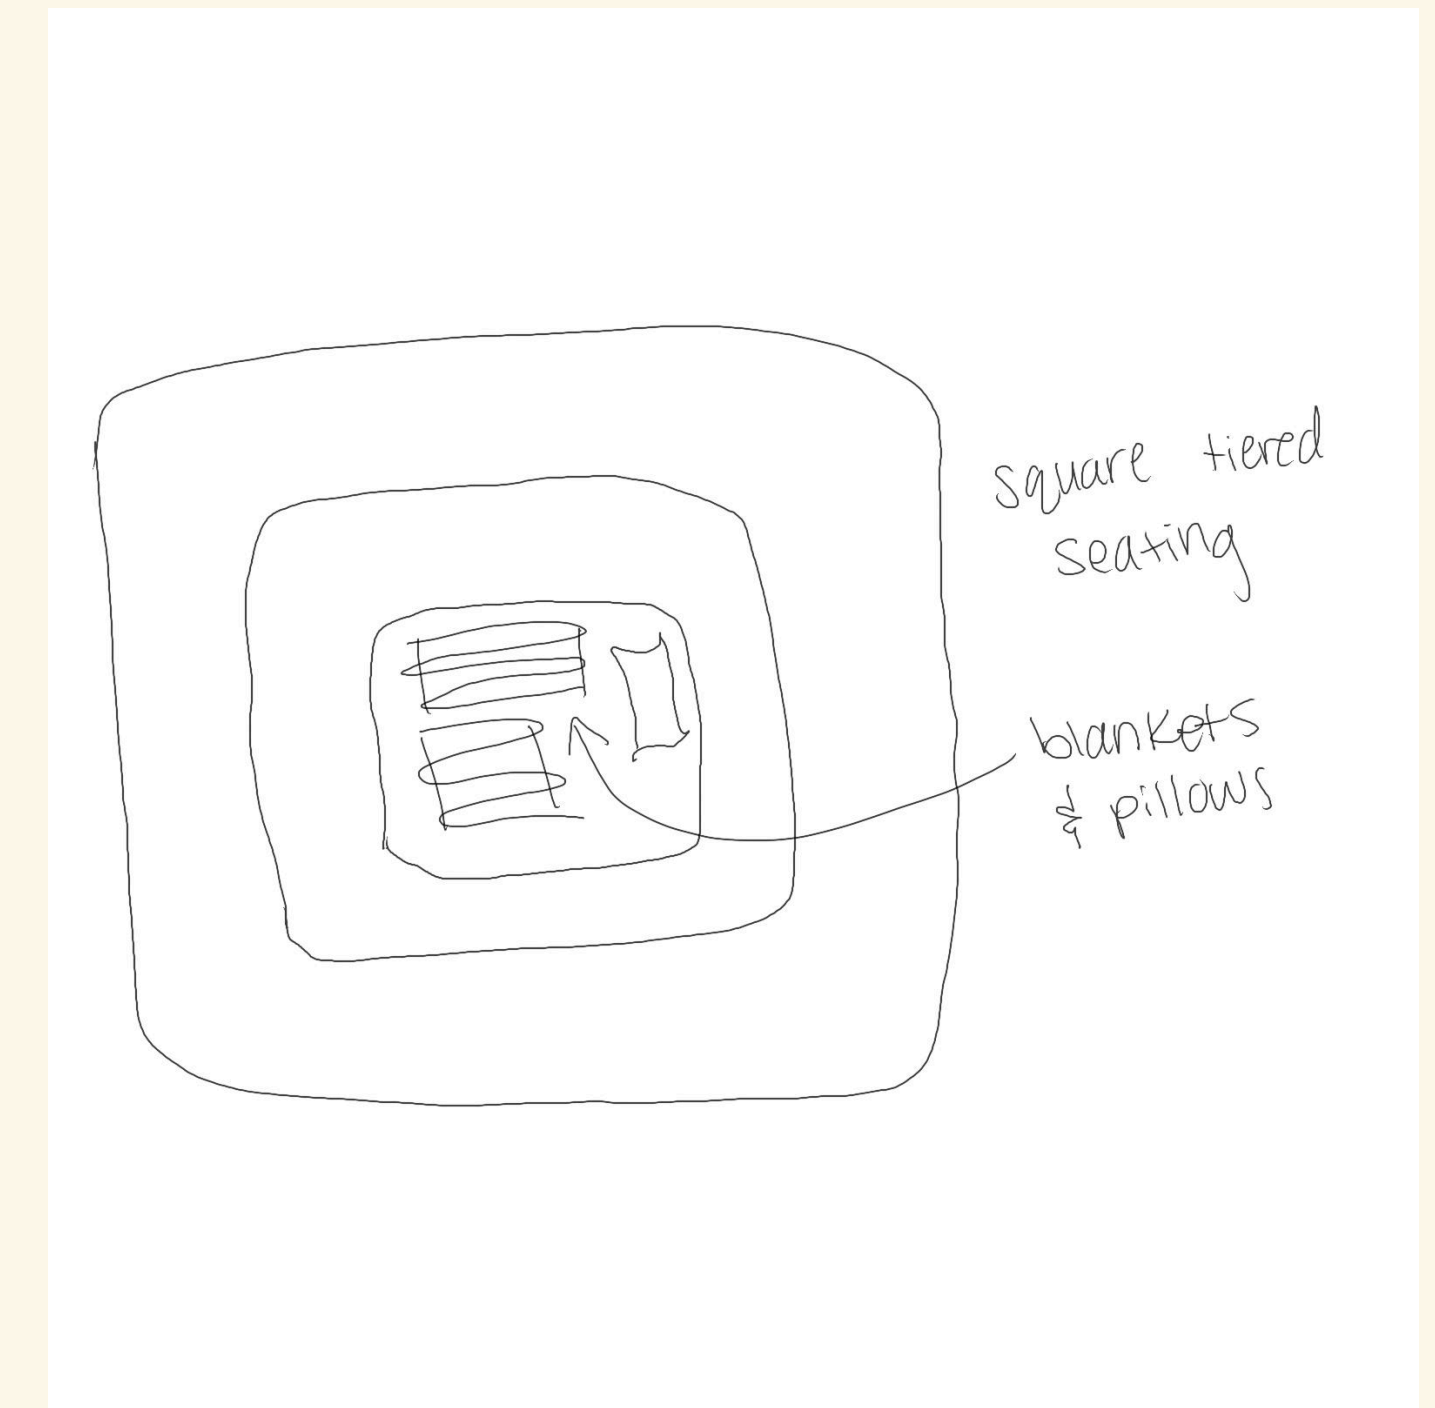

changed shape of room to look like a house.

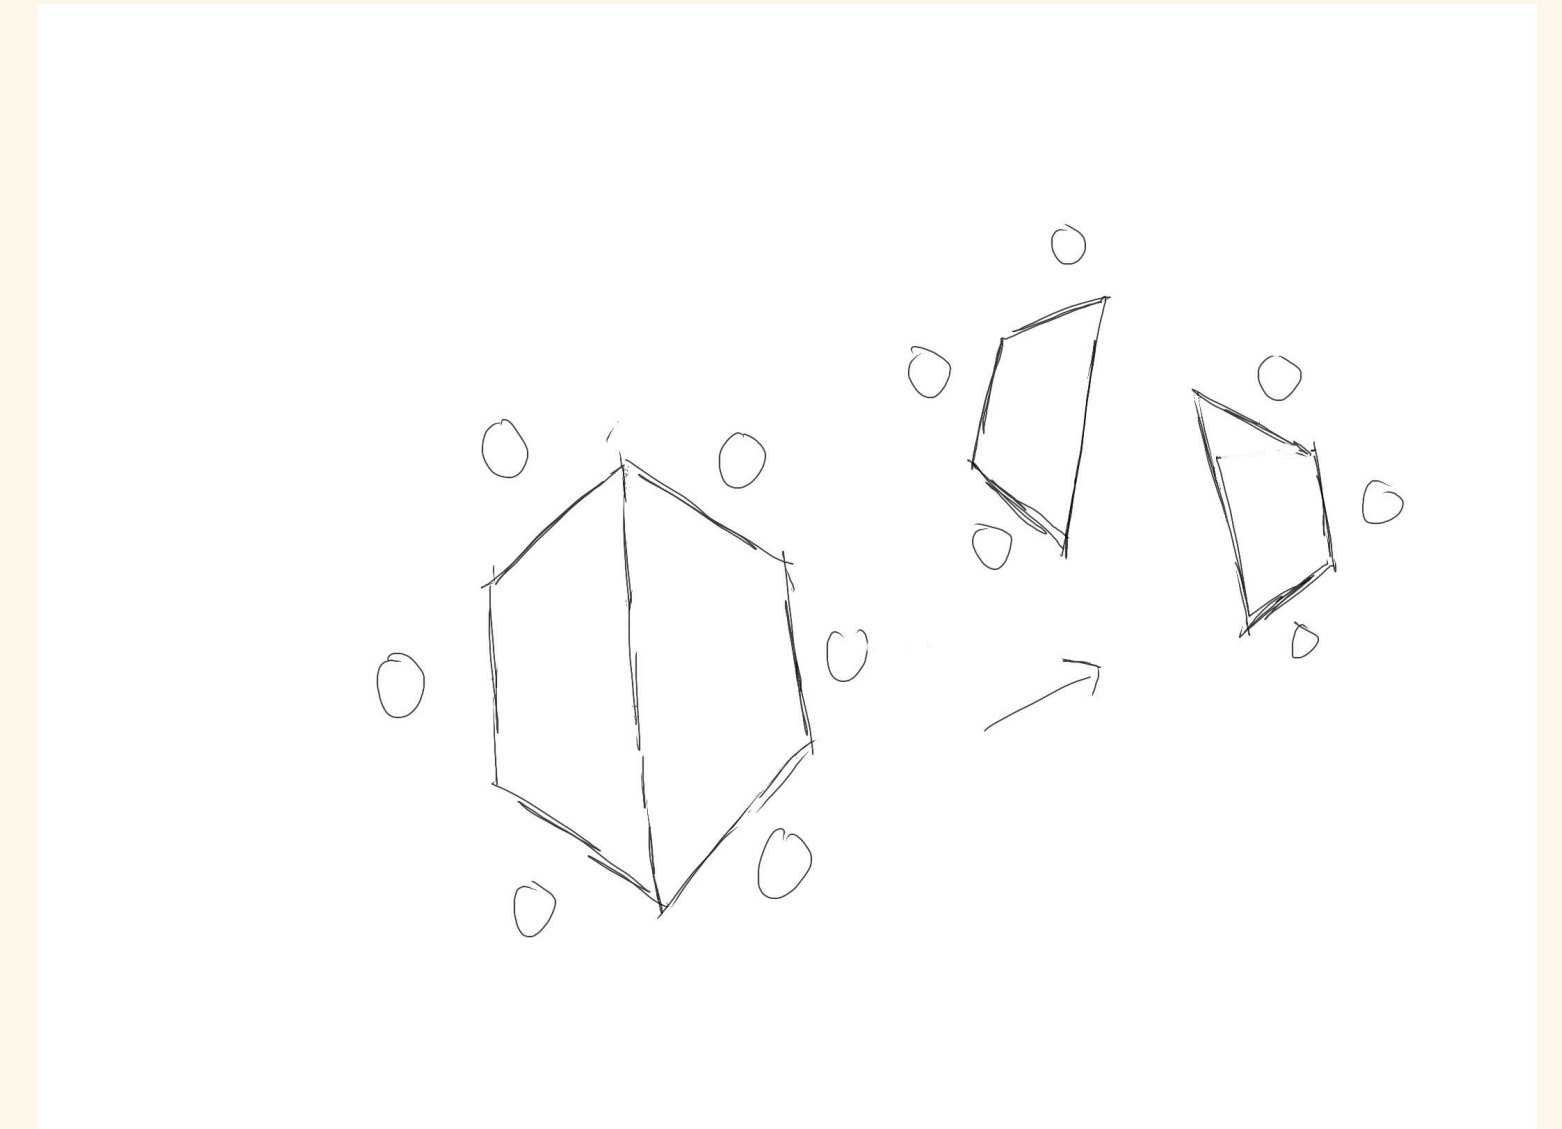

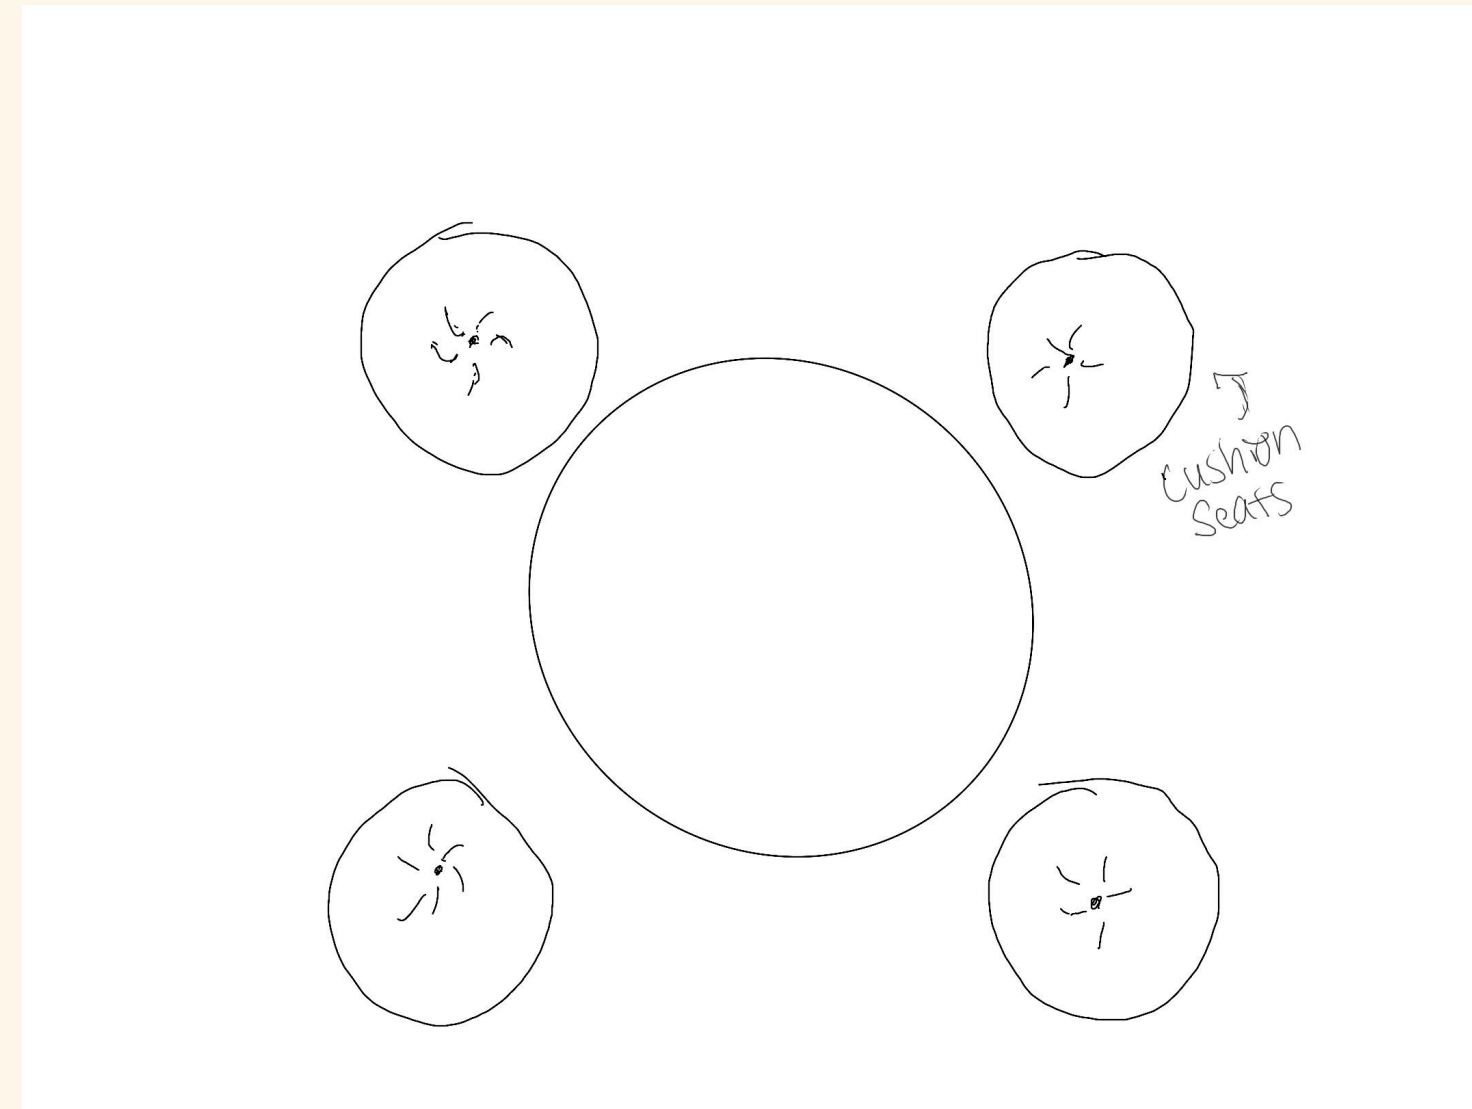

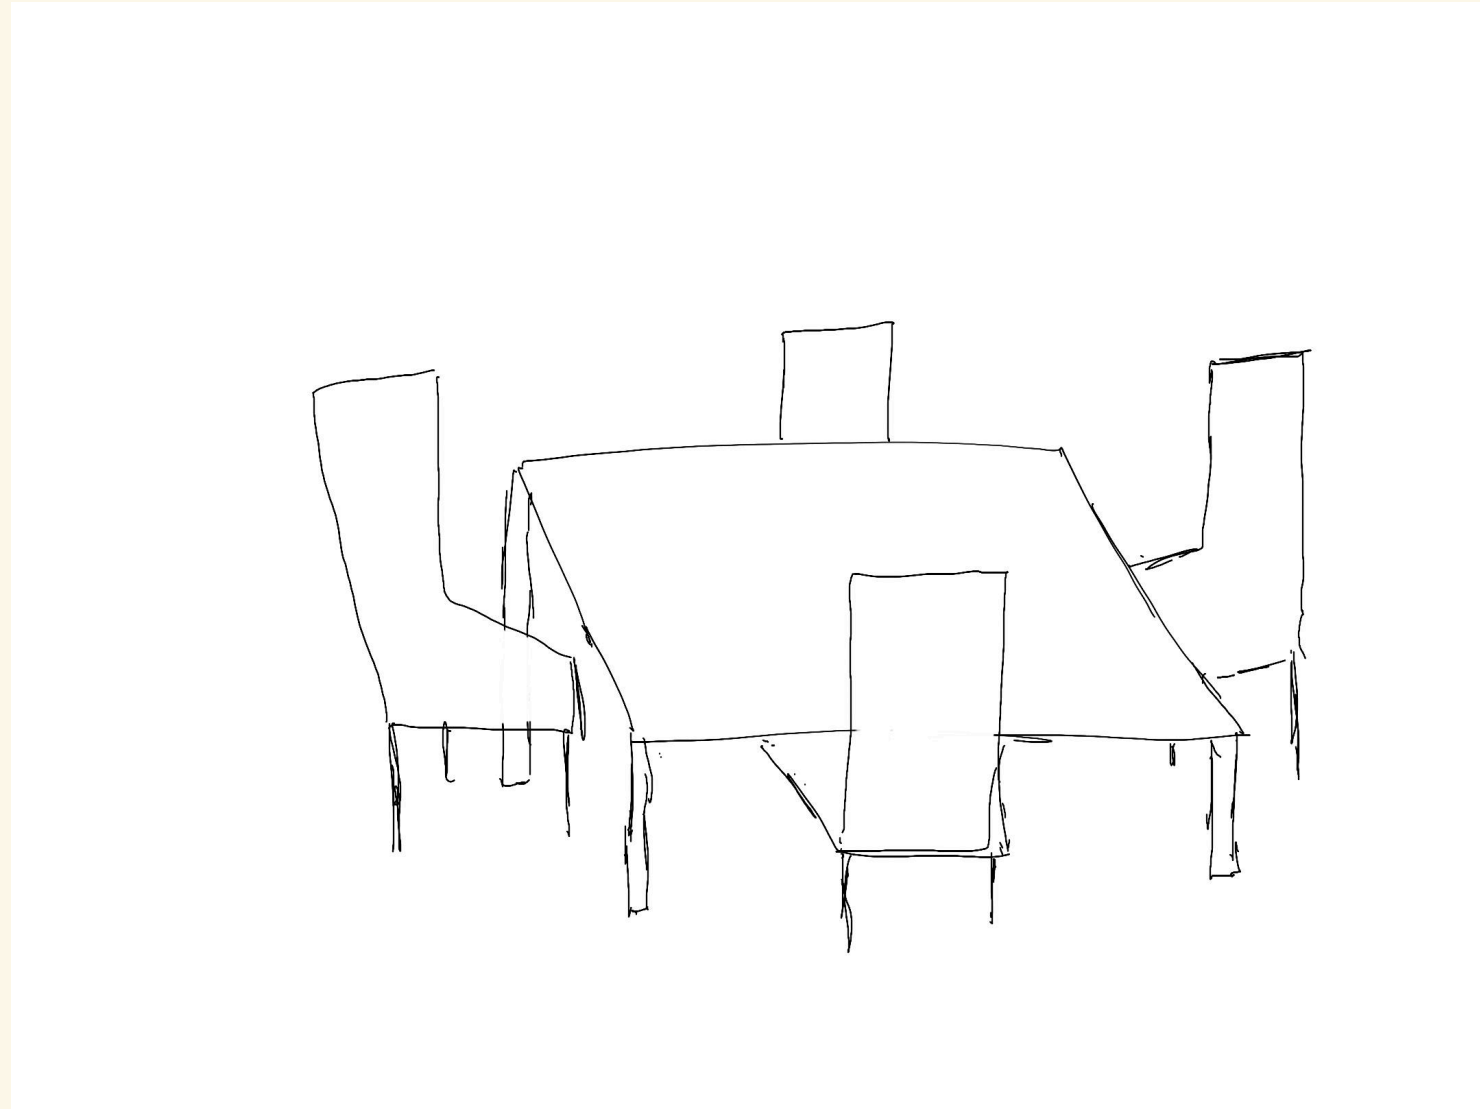

inspired from childhood home

circular bench allows for creative
resting, however it could use
more corners for support, so this
shape gets turned into a square

square tiered seating with space
for blankets in between. in the
final render I incorporate the
chandelier as a ceiling light
hovering over the center of this
piece.

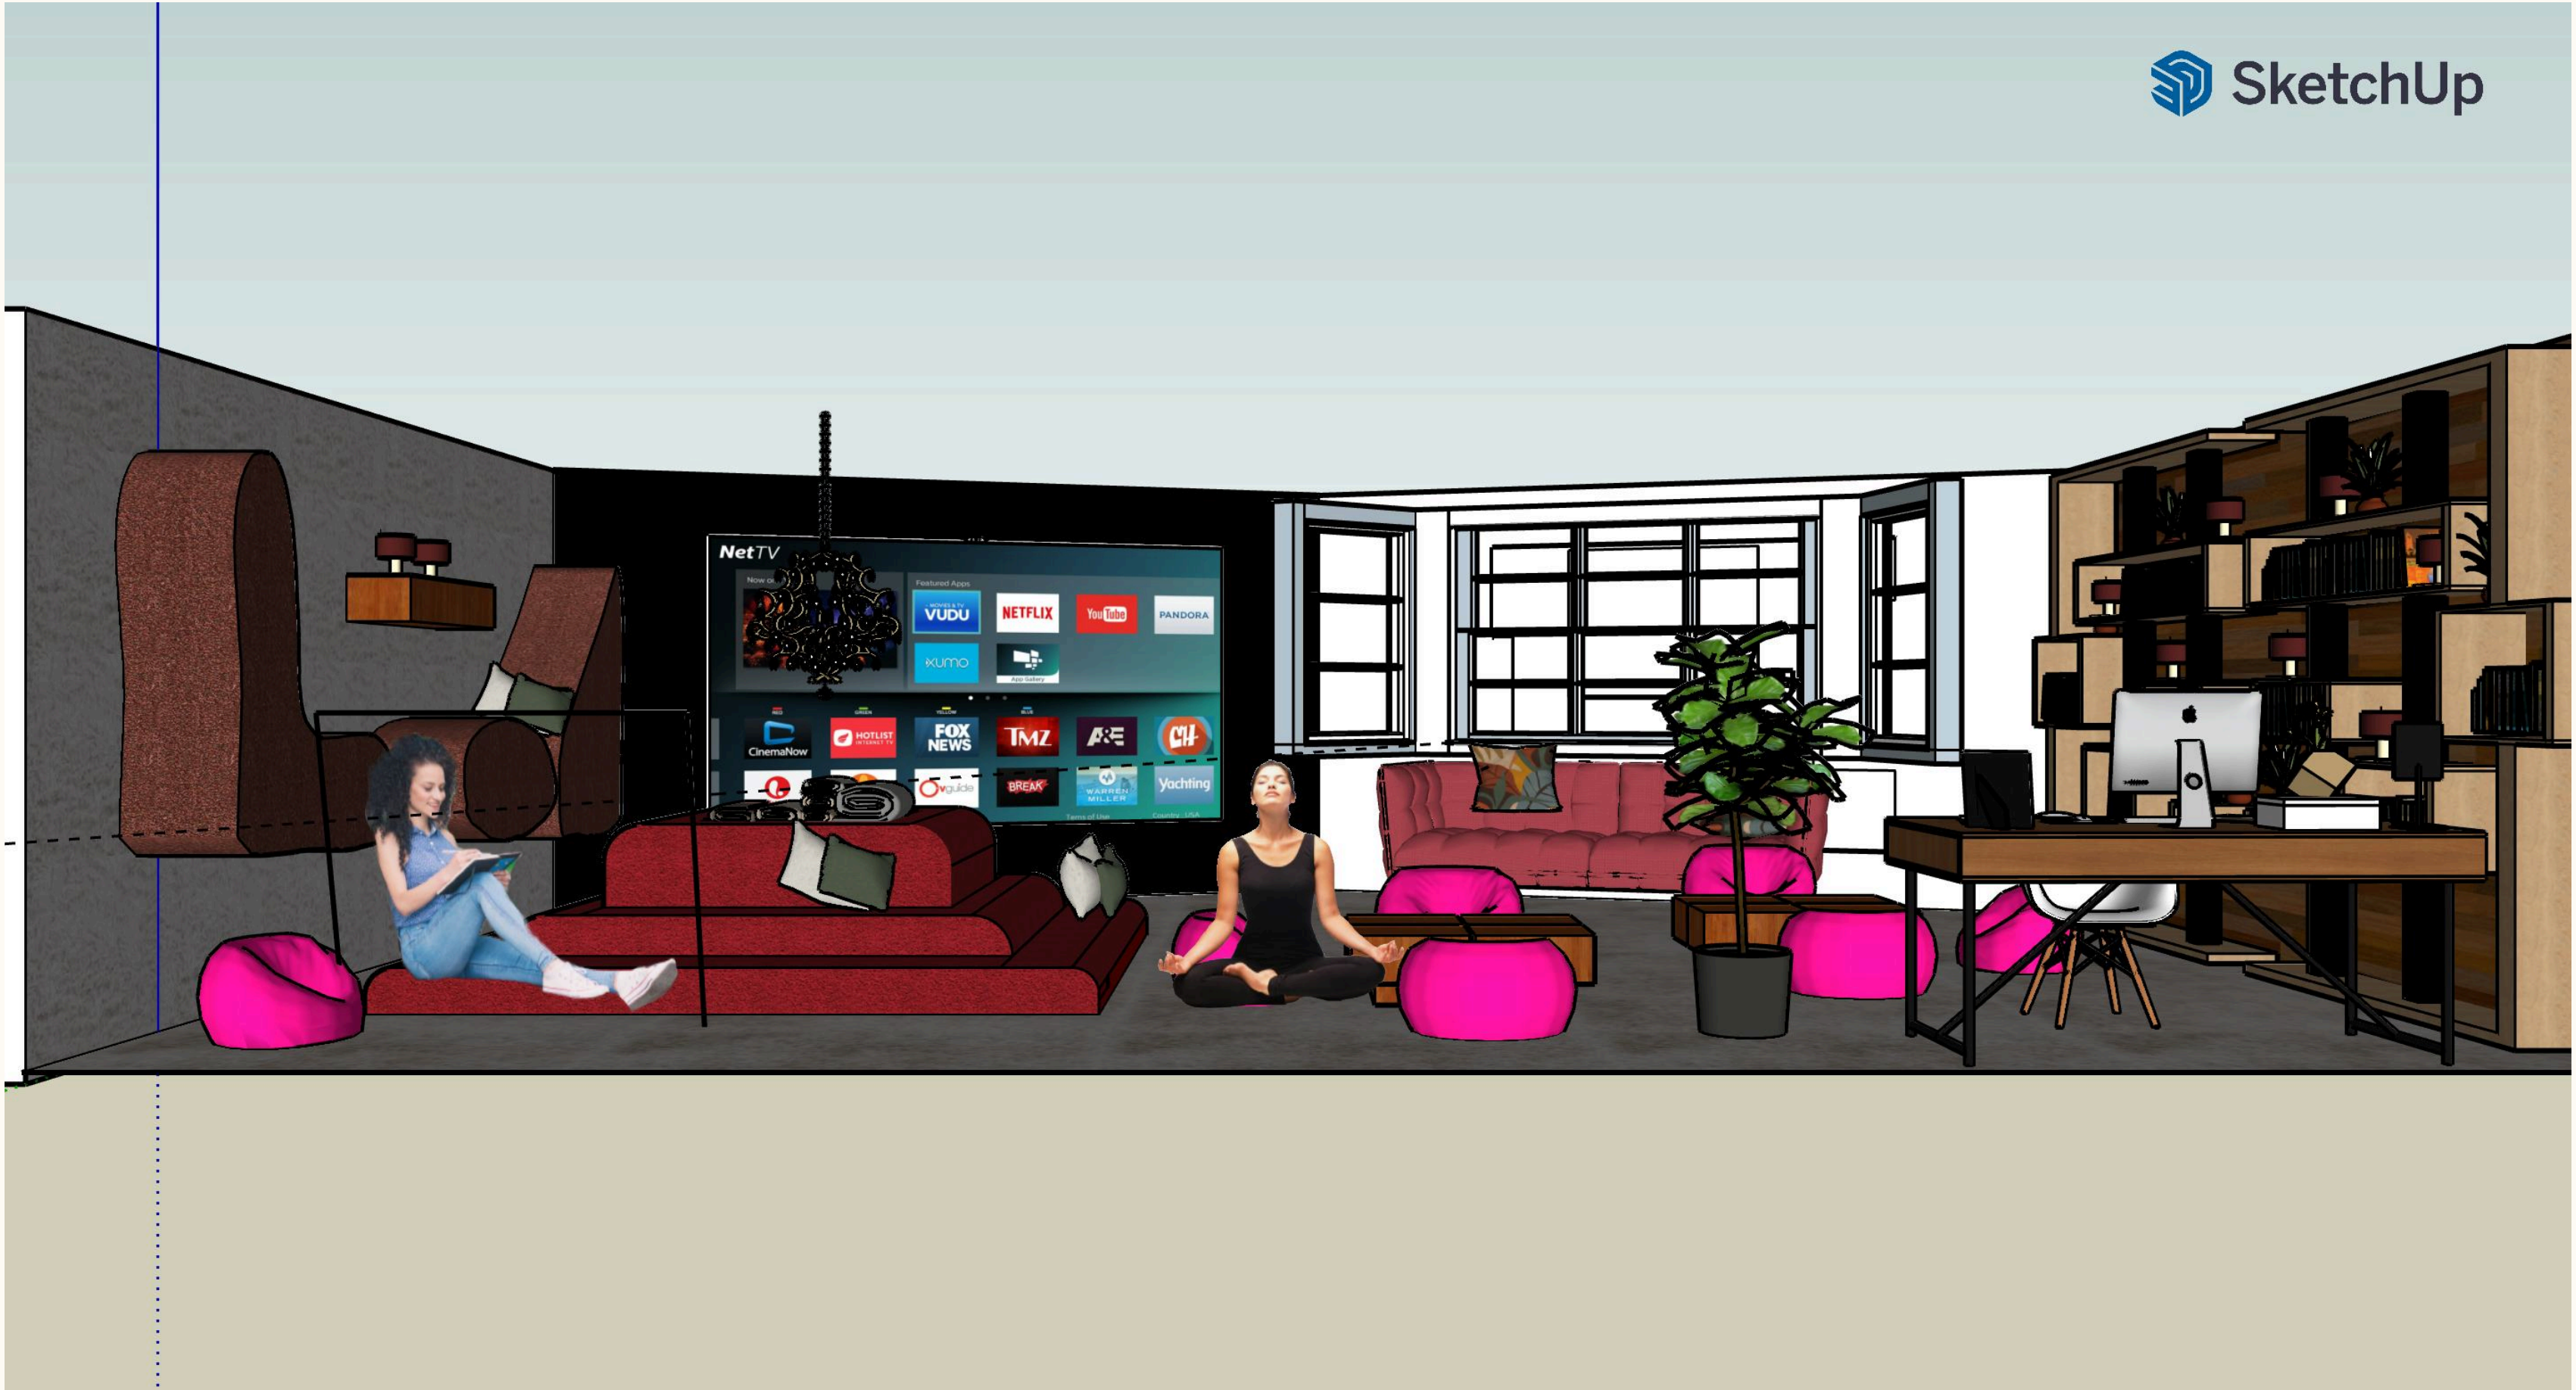

various options for general seating around the area. since this is more of a personal space, there would be max 4-6 people in the room.

ultimately, the final render is a combination of these three. there are square tables with circular bean bags so that the tables can be moved around and fit into corners, and the chairs can be used as seats, support, and general comfort.
