

THALES

Final Proposal

GROUP 8 | JAQ, SAMA, DOM, ALLISON

SOURCES OF TRAVEL ANXIETY

Long wait times
and congestion

Navigating unfamiliar
airport layouts

Transportation
from the Airport

Airline  **passengers** who feel  **anxious** about the  **post-flight** process need to know how to  **navigate** destination airport layouts but often  **lack guidance**, leaving them  **stressed and unprepared.**

PROBLEM STATEMENT

Design a personalized and interactive destination map using Thales InFlyt in order to increase **amenity accessibility, spatial awareness** and **wayfinding** around unexplored airports before they even leave the cabin.

FEATURES

- Flight data via Thales InFlyt
- Location data on
 - Shops
 - Restaurants
 - Utilities
- Live data for wait times
- Travel times
- Allows order and pickup for shops

YOUR TRIP

Taipei to Los Angeles

✈ LAX 4:58PM

- Gate A7
 - WALK 8 MIN
- Immigration services 30-45 MIN
 - WALK 4 MIN
- Umami Burger 5-10 MIN
 - WALK 6 MIN
- Baggage claim 20-30 MIN
 - SHUTTLE 10 MIN
- Rideshare pickup

Add stop

EXISTING SOLUTIONS

Singapore Changi Airport (SIN)

Dubai Airport (DXB)

SECONDARY RESEARCH

BENEFITS

Reduces traveler stress

Increased revenue for the retailers

Prolongs screen usage and dependability

\$86.4B
MARKET SIZE (2024)

5B
YEARLY FLIERS

Travel Retail Market Size

by Component, 2020 - 2030 (USD Billion)

NEXT STEPS

More user testing with the interface

More discussions with the airline and airport logistics to ensure all 3 parties are working in harmony

Further understanding the ground-to-flight telecommunications barriers

A reality in which the all-too-common anxieties surrounding air travel are near-zero

Where each passenger has all the pertinent travel information at their fingertips

and seat-back screens become just as ubiquitous and essential an airport tool as a FIDS are.
