

PRIMARY POSITIONING MATRIX

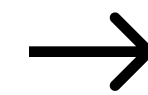

SECONDARY POSITIONING MATRIX

PROBLEM

despite the variety of lighting options available on the market, there remains a gap in meeting consumers' desires for products that integrate both aesthetics and function. current lighting options fail to effectively address the need for lighting that serves as functional statements pieces, creating an experience in more personalized spaces like a dorm or apartment.

OPPORTUNITY

design a lighting product that not only illuminates but also serves as a statement piece, enhancing the aesthetic appeal and creating an experience within a space. this product should blend functionality with artistic expression, using vibrant and colorful elements to create a standout feature in any space.
