# CPRNIVAL POPUPS

## PROBLEM STATEMENT

USC students who may feel apprehensive about performing CPR **need to be willing to take quick and confident action in an emergency**, but they have not been consistently exposed to CPR education.

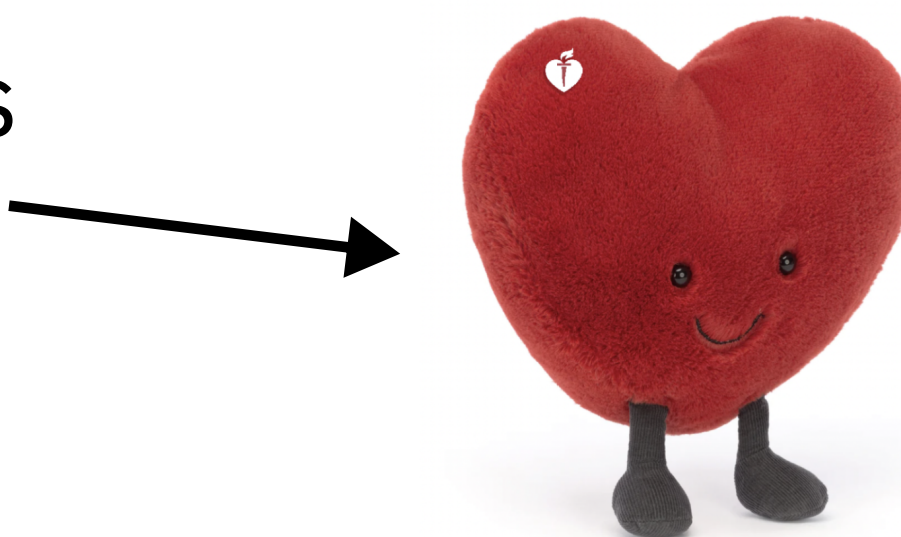

## OUR APPROACH

Make it fun! Other health campaigns (e.g. anti-smoking) are very serious, which can be lost in the noise of college students' daily life.

# CONCEPT

- **Carnival** themed reoccurring **pop-up** tent at wide-scale **USC events** to **teach** CPR through **games**
  - Allows for students unfamiliar with CPR to learn how to perform it through **hands-on learning**
  - Allows students who already know CPR to **improve** performance and gain skill **confidence** (skill upkeep)
- Features **interactive** game with prize incentive to make training more fun and **engaging** for students
- Exclusively plays 100-120 BPM music (CPR BPM)

Heart plushy prizes - plush has clicker inside for CPR practice

# INTERACTIVE MULTIPLAYER GAME

- A series of just dance-inspired games that use songs with a bpm similar to “Stayin’ Alive” so that contestants can compete to **perform** the best CPR
- Fosters an environment that encourages students to **learn** and gain **confidence** to compete
- Celebrity CPR dummies to establish a brand and **connection** with college students.  
(‘Dummi Lovato’) (‘Ice Save-A-Life’)
  - Make training more light hearted and fun

## Incentives:

- Priority tickets at Galen
- Trendy heart plushy prizes

cool for the  
summer  
(122 bpm)

~~JUST  
DANCE~~

STAYIN' ALIVE

## SKILL UPKEEP

Regular pop ups to help  
with **skill upkeep**

## CONFIDENCE

Gamification of CPR  
training & proper form to  
**gain confidence**

## AWARENESS

Plushies and prizes as  
marketing to **spread  
awareness**

# CPRNIVAL

We'd love to scale to a **one-day carnival** for students to learn about CPR if each pop up is able to consistently reach 300 students/mo.

Held in McCarthy Quad, similar to Visions and Voices events, USC Concerts, Pridefest, etc.

## ACTIVITIES

- Just Dance CPR game + other interactive CPR/heart health related games
- Drag show where someone drops “dead” to attract attention and create buzz
- More booths with mannequins and AEDs to create familiarity with the full process

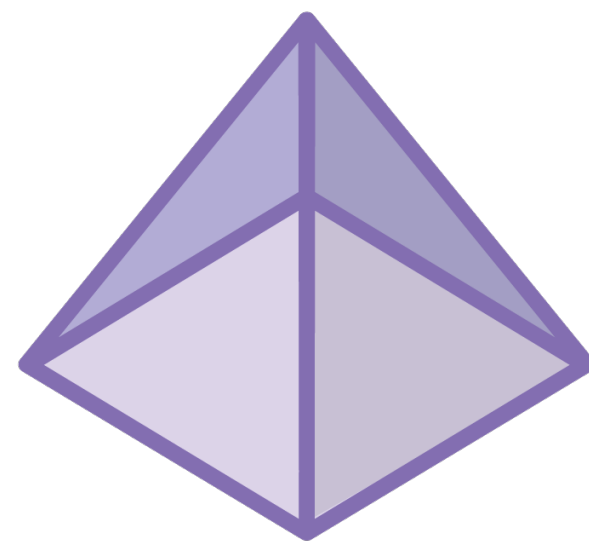

Creates one large touchpoint that USC students will naturally encounter

Provides a more in-depth experience than the pop-ups

Pop-ups continue to provide regular touchpoints

# PARTNERSHIPS

Building connections through USC's communities.
